The Winner's Way to Weigh

METTLER TOLEDO

Innovative Solutions for Postal Applications

METTLER TOLEDO offers a broad range of scales and accessories for numerous applications to meet your needs within the post office and postal environment. The equipments can be adapted to customer's software and integrated into their systems (franking machines, sorting machines, self service tellers).

Find out what METTLER TOLEDO can do for you.

Specifically suited for the postal customer.

From postcards to heavy parcels – METTLER TOLEDO supplies the suitable solution for weighing, dimensioning and for sorting applications.

For point of sales, shipping, and manifest applications METTLER TOLEDO products can be used with PC based shipping systems, with multiple protocol support for easy interface, metric or imperial indication, and smooth or ball top platter for conveyor operations.

METTLER TOLEDO is the specialist for precision instruments for professional use. In addition to a wide product array, METTLER TOLEDO offers the most comprehensive range of services on a global level.

METTLER TOLEDO serves global customers on a worldwide base with the largest sales and service network in the weighing industry. Sales and service organizations around the globe ensure that the customer can benefit from welltrained, experienced, and dedicated specialists.

Step-up to METTLER TOLEDO quality and rely on the world's leading scale manufacturer for all your critical business in post, shipping, and mailing.

Point of Sales

Point of Sales Applications

The range of scales for POS applications from METTLER TOLEDO at the post office counter and postal retail outlets has proven to bring many benefits to the user and has become a reference amongst European postal organisations!

From a small model for letter weighing up to 6kgs or to 35kg large combined letter and parcel scales METTLER TOLEDO is able to offer precise weighing solutions without taking up too much counter space.

02

03

Looking for high capacity, speed, and reliability?

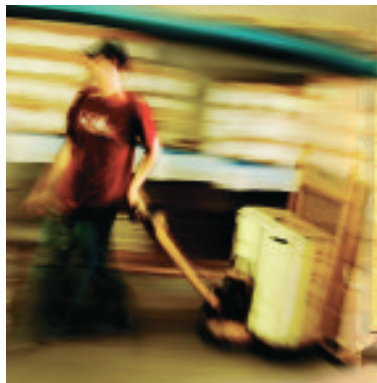

- Easy to use
- From 6 to 1500kg
- Robust
- Various accessories available

Back office

Combined letter-package

With BBA422-35 there is no need for a separate parcel scale – at least up to 35kgs – it is an all-in one solution – and has become a reference in many posts across Europe.

Postal expertise at METTLER TOLEDO goes well beyond point of sale

Corporate mail rooms and business mail collection points can also be equipped with the appropriate METTLER TOLEDO scale for reference weighing of letters to weighing complete mail room pallets.

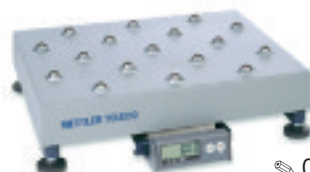

Whatever is needed – you will get the appropriate weighing solution

The PS and IND425 scales with capacities from 30kg to 1500kg are ideal solutions for shipping docks, back offices, and sorting rooms.

Dimensioning

METTLER TOLEDO sets the pace with dimensioning systems. Nowadays the volume of mail can be more important than the actual weight.

METTLER TOLEDO has extended its know-how and expertise in the dimensioning field with a number of scanning devices and more recently small dimensioning devices.

Speed, accuracy, and identification capabilities are all requirements which can be satisfactorily fulfilled by know-how, competence and reliability for which METTLER TOLEDO is known.

06

07

METTLER TOLEDO provides the solutions to serve you at all levels of dimensioning.

10

Looking for a qualified, experienced partner for your product range?

- Easily integrated scale bases
- Approved scales
- Weigh modules
- Recognized global partner

METTLER TOLEDO supplies weighing technology to a number of suppliers of different applications for postal use.

Integration & Individuality

Weight Technology Integration

METTLER TOLEDO is a leader in integrated Point of Sale weighing systems. Retail transactions that require a weight measurement can greatly benefit from METTLER TOLEDO expertise. The high accuracy scales can easily handle the unique postal requirements, whether they have tolerance ranges or

exactly 1 gram resolutions. The multi-interval scales can handle very high resolutions for letters and post cards and yet still handle heavy parcels and can be incorporated into postal self-service devices where letters and / or parcels can be weighed, franked and sent without involving post office personnel.
